

Panolar 40 kN/m² beton basınç dayanımına sahiptir. Panoları insan gücüyle taşınabilir. Aynı zamanda bloklar halinde vinçle de taşınabilir.

Tek bir bağlantı elemanı ile panolar birbirlerine tek bir çekiç darbesiyle kolayca kilitlenir.

Sistem temel olarak Sac/Plywood Yüzeyle Çelik Çerçeve Panolar, kuşaklar ve diğer çelik aksesuarlardan oluşur,

Aynı ölçüde kolon sayısının fazla olduğu projeler için tercih edilir, Ek modifiye parçalar alınarak farklı projelere adapte edilebilir, Panolar elle deplase edilebildiği gibi, kolay kullanılan pano kilitleri ile bir araya getirilerek vinçle taşınabilir,

Montaj kolaylığı, elle-vinçle deplase edilebilir olması ve sıva gerektirmemesi ile işçilik, zaman ve maliyetten tasarruf sağlar, Konut, sanayi yapıları, alışveriş merkezleri gibi farklı alanlarda yüksek verimle kullanılabilir.

Panels have the concrete pressure resistance of 40 kN/m². Formwork can be carried by hand. At the same time, it can be transported in blocks with crane.

With a single connection component, panels are locked each other with a single hammer strike.

The main components of the system are Steel/ Plywood Surfaced Steel Framed Panels, Steel Walers and other

Preferable for the projects having mostly the same size columns,

The system can be adapted to various projects by using extra adaptation elements,

The panels can be displaced both by hand or by crane, combining each other by using u-clips to form larger panels, Provides cost, time and labour economy as being easy-to-assemble, crane displaceable and preventing the necessity for plastering,
